

Interview 1st : PHP [Duration - 1 hour]

1. Take 3 (A, B, C) text input field
2. User can type so many letters in field "A"
3. When user enter any one letter in field "B" then total numbers of letter will show in field "C"

Interview 2nd : PHP

1. Take 4 text fields with name Math, Science, Year and Class. And take 4 input fields respectively.
2. Add a Button "Upgrade Class".
3. When user click on "Upgrade Class" button then a row will be added in new entry where Input marks of Math and Science can be changed. Year and class field auto upgrade.
4. In the second row give buttons "Upgrade class"
5. Again it repeats the process of point 3 but button "Upgrade class" will be freezed in 2023. If we change year to before 2023 Upgrade class button will be active.

<u>view all</u>				
math	Science	year	class	modify
80	75	2021	5	9
75	60	2022	6	9
60	80	2023	7	9

6. Add a button to "view report" where all the report of year 2021 to 2023 can be viewed.
