PROJECTS

Food Ordering App
With the help of React js I made a Food order application in this project I have used react concept like react hooks.
UseState,useRef,useContext,useReducer and other concept has been implemented

URL: https://food-ordering-app-203d9.web.app

Expense Meter
With the help of React js I have created Expense Meter where anyone can add there expense and see which month what he take.

URL : https://expense-meter-8a278.web.app

Login - Logout - Handler
With the help of React js I have developed an application in which we can perform login and logout activity with some awesome side-effects also.in this project I have used different react concept like useEffect and others

Travel And Devotion Website
This is the mini project context with travel problem faced by the tourist in Varanasi UttarPradesh.it is static website
Technology used: HTML, CSS
